A potent cold upper area of low pressure aloft plowed through the Lower Mississippi Valley Saturday night into early Sunday morning, producing light to moderate snow across a good portion of the ArkLaMiss region. Most of the region experienced at least some snowfall during this event. The bulk of measured accumulations, greater than a dusting, were generally confined north of I-20, while accumulations of an inch or greater were mainly limited to areas of Central and Northern Mississippi. Most of the heaviest snowfall, between 1 and 3 inches, was measured with this system across the northeast portion of Central Mississippi.

A short swath of penny sized hail fell just southwest of Natchez and across some of the City. Frequent lightning was also observed with this storm.

LAUDERDALE COUNTY --- 4.6 SSE OKATIBBEE [32.24, -88.71], 1.2 SE ZERO [32.29, -88.64]

03/25/09 10:07 CST 0 Source: NWS Storm Survey

This tornado began near the Lauderdale-Clarke county line about one quarter of a mile from Sam Gray Road. Along the path, a roof was blown off a house and a barn was damaged. Numerous trees were blown down along the path with some trees on a church. A portion of Highway 45 was closed due to trees across the road. Maximum winds were around 95 mph.

FORREST COUNTY --- 2.9 ENE DIXIE PINE [31.31, -89.23], 1.0 WSW BONHOMIE [31.27, -89.34], 0.9 NNW MAMMOTH SPGS [31.38, -89.35], 2.6 W MACEDONIA [31.38, -89.22]

A series of storms moved across the northern portion of Forrest county. Widespread 1 to 3 inches of rainfall was reported in the Hattiesburg area. Flooding was reported on numerous roads and streets around Hattiesburg. Three to four cars were flooded within a mile of Forrest General Hospital with a person trapped in his car from high water.

CLAIBORNE COUNTY --- 1.0 SSE WESTSIDE [31.89, -91.14], 3.5 NNE ALCORN [31.95, -91.09]

Location Date/Time Deaths & Property & Event Type and Details Injuries Crop Dmg

This tornado started just off of County Road 20, on private property, about 1 mile ESE of Montrose. Several trees were uprooted/snapped at this location and again just to the east along County Road 206. The tornado moved across several miles of wooded bottom land before crossing County Road 2414. Substantial damage occurred along County Road 2414, 4 homes were heavily damaged. The worst was where a home on pillars was pushed off its blocks. One quarter of the roof was heavily damaged. Numerous trees were snapped and uprooted with 2 large trees down through a mobile home. An ATV was rolled down a hill over 100 yards. The tornado then crossed Highway 503 and destroyed an old church building. The weakly fastened roof was blown off and then the walls collapsed inward. Numerous trees and several power lines snapped. Path width was around 500 yds at this point. The tornado continued to the ENE through northern Jasper County. Another home was pushed off its pillars and peeled all the tin off the roof, this occurred on County Road 24. The tornado then crossed County Road 2422 and downed many more trees, tore part of the roof off one home and damaged an old shed. Another old structure had some of the tin roof peeled off. The tornado crossed into Newton County at 2:52 am. It then crossed Griffis Fountain Road. The tornado crossed Parks Mill Road and dissipated just to the east of that point. Many trees were damaged along Parks Mill Road. The total path length across both counties was 19 miles. Maximum winds were around 110 mph.

JONES COUNTY --- 2.4 NW REDDOCH [31.75, -89.39], 2.2 ESE UNION LINE [31.79, -89.23]

03/26/09 01:54 CST 1 0.15M Source: NWS Storm Survey

This tornado touched down along Mason Creek Rd about 6 miles west of Soso. Several trees were snapped and uprooted and some minor roof damage occurred to a few homes. The tornado intensified as it crossed Summerland Road. Here the tornado widened to 500 yds and reached peak intensity, especially within a narrow corridor which lasted about 3/4 of a mile. One well constructed home suffered major damage with half of the roof torn off and other wall sections of that side the house ripped out and thrown into the back yard. Two well built storage buildings were destroyed with the contents thrown into a field. Additionally, a weekly built barn was destroyed with tin thrown along the path. Numerous trees were snapped and uprooted in this area with splintered trees within the most intense core. One large tree in this location was uprooted and actually thrown and rolled a small distance. The tornado continued to track just east of north across several more roads, including Highway 28 and 503, uprooting and snapping numerous trees. On the east side of Highway 28, a mobile home was pushed off its foundation and the person inside was injured. The tornado continued to weaken as it crossed Highway 503 and damaged more trees and caused minor damage to several mobile homes and heavily damaged a couple sheds. Maximum winds were around 125 mph.

NEWTON COUNTY --- 5.3 NNE ROSE HILL [32.22, -88.98], 5.3 S CHUNKY [32.24, -88.92]

03/26/09 01:52 CST 15K Tornado (EF1, L: 3.47 mi , W: 200 yd)

This tornado started just off of County Road 20, on private property, about 1 mile ESE of Montrose. A roof was peeled off a mobile home off Vimville-Causeyville Road and several trees were blown down across the southern portion of the county.

A round of severe thunderstorms, containing tornadoes and damaging straight line winds, occurred Wednesday night, March 25, into early Thursday morning, March 26. These storms developed as a strong upper level disturbance encountered an unstable environment over the lower Mississippi Valley. A squall line of showers and thunderstorms pushed rapidly eastward across the area. One supercell

Page 7 of 14 Printed on: 06/13/2009

Location Date/Time Deaths & Property & Event Type and Details

Injuries Crop Dmg

storm formed ahead of the main line and produced a strong tornado which hit the town of Magee.

Eight tornadoes were confirmed from this event. Of the 8 tornadoes, 1 was rated EF3, 1 was rated EF2, 4 were rated EF1, and 2 were rated EF0. Numerous other locations experienced damaging straight line winds in excess of 60-70 mph. The worst damage occurred from a tornado which laid a 17.5 mile long track across Simpson and Smith counties. This storm was rated as EF3 with estimated 150 mph maximum winds near Magee. A second strong tornado, rated EF2 with 125 mph winds, effected Jones County near Soso.

The roof was blown off this home in southern Lauderdale County MS. This damage was from an EF1 tornado which occurred around 11 am March 25, 2009.

ADAMS COUNTY --- 2.0 N NATCHEZ [31.60, -91.40], 0.2 NNW PINE RIDGE [31.63, -91.35]

For the third consecutive day a powerful storm system brought a round of severe thunderstorms containing damaging straight line winds and two tornadoes which occurred Friday afternoon and night. These storms were associated with a strong upper system moving across the region. Most of the damage was associated with straight line winds to be 70 to 90 mph. However, two tornadoes did occur with the strongest an EF1 in Smith County. This system also dumped several inches of rain which caused some flash flooding in some areas.

was reported in the Carnes area.

A potent upper level disturbance combined with good instability ahead of a cold front utilized cold temperatures aloft to produce hail producing storms. It produced hail from penny to golf ball size.
